Storage Bin Dispensers	8
Wiper Dispensers	10

Material Choices

The standard material used is clear acrylic. Optional materials are indicated by a letter code following the part number.
A - amber acrylic **G** - gray acrylic **P** - PETG
i.e. GD-400 (clear acrylic), GD-400 A (amber acrylic)

Acrylic A strong material that is scratch resistant and very attractive. Readily available in a variety of colors and thicknesses.

Clear Crystal clear clarity creates attractive and durable products.
Amber High visability 'Safety Orange' is easy to see, good for high traffic areas.
Gray Provides good UV protection yet still transparent.

PETG A clear polyester plastic that is immune to IPA (Isopropyl Alcohol) and cleaning agents that include alcohol. Although more resistant to chemicals, PETG is softer than acrylic and more prone to scratching.
PETG - "PolyEthylene Terephthalate Glycol modified"

Cleaning Instructions

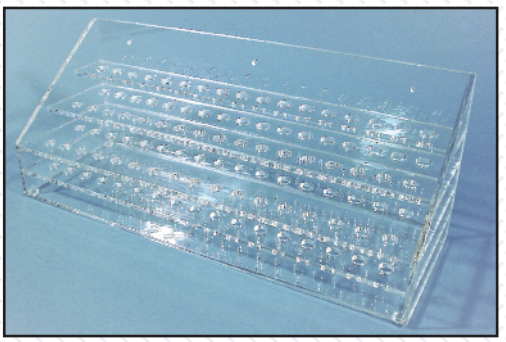

Acrylic material Use a plastic cleaner or mild detergent and water.
DO NOT use IPA (Isopropyl alcohol) or harsh chemicals to clean acrylic. These may cause cracking or crazing. Hydrogen Peroxide or Bleach can be used safely with Acrylic.

PETG material Use a plastic cleaner or mild detergent and water with a soft cloth.
IPA, Hydrogen Peroxide, or Bleach can all be used safely with PETG.

Custom Designs

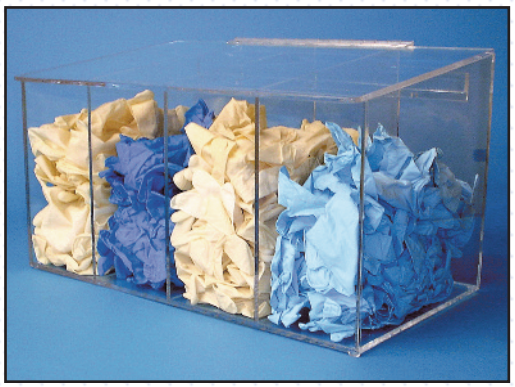

Custom designs are modifications are available!
